2012-13 Eligible Electives for the Neuroscience Major/Minor

**Summer Term 2012**
No Eligible Elective courses

**Fall Term 2012**
40. Introduction to Computational Neuroscience, Granger, 2A.
*50.1 Neuroscience of Mental Illness, Funnell, 12.
50.2 Sleep and Sleep Disorders, Sateia, 2A.
60. Principles of Human Brain Mapping with fMRI, Kelley, 2A.
81.1 Neural and Cognitive Mechanisms for Person Perception, Gobbini, 2A.
83.2 Affective Neuroscience, Whalen, 2A.
86. Addiction, Robinson, 10A.

**BIO** 69. Cell Signaling. Dolph, 2A.

**Winter Term 2013**
43. Emotion, Whalen, 2A.
50.1 Exotic Sensory Systems, Hughes, 11.
*50.2 Evolutionary Psychology, Kralik, 10.
*53.1 Social Perception, Duchaine, 10.
*53.2 Social Neuroscience, Freeman, 2.
60. Principles of Human Brain Mapping with fMRI, Kelley, 2A.

**EDU** *64. Development in the Exceptional Child, Coch, 9L.
*188. Seminar in Human Development: The Changeable Brain, Coch, 3A.
**PEMM** 211. Seminar on the Neurobiology of Disease, Lee, TBA.

**Spring Term 2013**
28. Cognition (cross-listed with COGS2), Kelley, 2.
51.1 Mind & Brain, Meng, 2.
*51.2 History of Psychology, Hughes/Whalen, 2.
*52. Developmental Psychopathology, Scheiner, 9L.
*53. Social Perception. Norris, 10A.
85. Higher Level Cognition, Kralik, 10A.
86. Selective Deficits, Duchaine, 10A.

**BIO** 37. Endocrinology, Witters, 10A.
**EDU** *50. The Reading Brain, Coch, 9L.

*For these courses, you must let the instructor know you intend to use the course for Neuroscience credit as additional criteria may apply (e.g., subject of term paper, etc.)

Elective credit only, cannot be used as a culminating experience course

PSYC = Psychological and Brain Sciences; EDU = Education; BIO = Biology; DMS = Dartmouth Medical School, PHYS = Physiology, PEMM = Program in Experimental and Molecular Medicine.
