Neuroscience Research Associate Recruitment Program
Applications open January 20, 2022

Labs at the NYU Neuroscience Institute and across NYU are seeking research associates starting in 2022.

Research areas include:

- Genetics
- Molecular biology
- Cognition & behavior
- Developmental biology
- Physiology
- Neurodegeneration
- Systems neuroscience
- Computational neuroscience

Neuroscientists at NYU are members of a stimulating, collegial community and equipped with advanced technological resources in the heart of Manhattan. Our technicians conduct groundbreaking research with leading scientists, gaining valuable experience and preparation for graduate school. The NYU Neuroscience Institute encourages talented graduates to apply for a Research Associate position.
