

## Research Coordinator

The **Research Coordinator** will be responsible for managing studies focusing on the phenomenology, biology, and treatment of anxiety, grief, and stress related disorders.

### Responsibilities

- Manages federally-sponsored and privately-funded research on the etiology and treatment of anxiety, traumatic stress disorders, and complicated grief, including oversight of research data, organization of regulatory binders, and management of study databases
- Serves as the liaison between the Principal Investigator and Institutional Review Board. Responsibilities include preparing and modifying ethics committee proposals and communicating with the IRB regarding ongoing studies
- Designs and manages advertisement campaigns to recruit specific populations for research studies
- Performs data entry, cleaning, and analysis
- Conducts literature reviews for grant submissions and ongoing research work at the center
- Assists in dissemination efforts on finding of research studies, including preparation of posters, presentations, and manuscripts
- Conducts phone interviews to assess fit with study inclusion/exclusion criteria and match participants to studies for initial screening visit
- Observe and assist with treatment groups, as necessary for ongoing treatment studies
- Provides referrals for patients who do not qualify for current research studies
- Acts as the primary research contact for patients enrolled in studies
- Manage patient charts and visit schedules
- Administers laboratory tests, including vital signs, electrocardiogram, urine toxicology, and phlebotomy
- Collects and processes patient blood and saliva samples

### Qualifications

- BA or BS in psychology or related field required
- Minimum of two years of progressively responsible project coordination experience, preferably in a research setting.
- Excellent interpersonal skills for work in collaborative research environment and with clinical population
- Attentive to detail and flexible in fast-paced work environment
- Exceptional organizational and time-management skills
- Statistical knowledge and experience with data management and analysis
- Competency in Microsoft Office, as well as standard statistical analysis tools
- Proficient written and verbal communication skills
- Prior preparation relevant to working in a research and clinical setting
- *Prior experience working in research laboratory or related clinical setting preferred*

This position starts in late May/early June 2017. These positions offer highly valuable clinical research experience in preparation for applying to graduate school in clinical psychology or medical school.

Applicants should include their CV/resume, a cover letter, and unofficial transcript in their complete application. To apply, please go to this url: <http://jobs.nyulangone.org/job/7057077/research-coordinator-new-york-ny/>

## **Research Coordinator**
